All applicants are advised that any and all records (documents, correspondence, memoranda, etc.), regardless of the form provided, received or maintained by the Rhode Island Infrastructure Bank or any of its agents, may be a matter of public record and subject to release under the Rhode Island Access to Public Records Act (R.I. Gen. Laws §38-2-1 et seq.). The Rhode Island Infrastructure Bank does however have the right to redact any information which is exempt under the statute before releasing the documents. The exemptions that would most pertain to financing or grant applications include but are not limited to reports and statements of strategy or negotiation, trade secrets and commercial and financial information which is privileged or confidential pursuant to R.I. Gen. Laws §38-2-2. As such, we suggest that any portion of the application or materials provided by the applicant that contains such information (including for example, customer lists, processes, etc. or financial information) be clearly labeled with a legend or marking such as "Confidential information -- Not Public Record". This does not guarantee that the information so marked will necessarily be exempt from public release, as the Rhode Island Infrastructure Bank will make any final determination about which information is to be made available to the public, but this will be helpful in identifying any records which may be exempt.

V. DOCUMENTATION OF ABILITY TO MONETIZE FEDERAL TAX CREDITS ASSOCIATED WITH CLEAN ENERGY INSTALLATIONS

C-PACE applicants can apply the value of all relevant federal tax credits (including the Investment Tax Credit and MACRS depreciation benefits) towards their projects' estimated savings.

However, all applicants seeking to have the value of such tax benefits credited towards their projects' estimated savings must demonstrate the ability to monetize those benefits within the timeframe allowed by federal law.

Please check either or both of the boxes below:

- As of this date and to the best of my knowledge, my company will be able to fully monetize the value of the federal Investment Tax Credit.
- As of this date and to the best of my knowledge, my company will be able to fully monetize the value of federal MACRS depreciation benefits.

Note: After confirming the property's eligibility and prior to finance closing, the C-PACE program administration team will request the following supporting documentation:

- Prior year federal tax return, for the corporate entity that will be taking advantage of the federal tax benefits associated with the clean energy installation at the property. If the corporate entity that will be taking the tax credits is not the direct owner of the property, the program administrator will request additional documentation that demonstrates the legal relationship between the parent corporate entity and the subsidiary owner of the property.
