

Request for Proposals (RFP)
Stormwater Project Identification and Realization (SPIRe) Consultant Services
Response to RFP Questions

1. Are we precluded from design for work that comes out of the contract?

As the project is concluded, RIIB will make OSG Sub-awards to a handful of municipalities, which will then go out to RFQ for a contractor to complete the stormwater design work. RIIB will defer to each municipality's procurement and contracting rules and procedures regarding contractor selection, including the determination of whether a conflict of interest exists that would preclude a contractor from bidding on a project.

2. Can potential grantees submit more than one application?

Municipalities may submit multiple applications and have multiple projects listed on the SPIRe PPL, assuming they meet the program eligibility criteria.

3. Are only municipalities eligible to submit for the SPIRe/OSG applications?

Yes, only municipalities may submit projects for the SPIRe PPL and receive OSG sub-awards from RIIB.
